

# EROS Data Center Ordering Procedures for Custom Photographic Enlargement Products

The EROS Data Center has established new ordering procedures for custom enlargement products.

## Procedures

1. Order the contact prints to cover your area of interest and establish the mode of payment for your entire order. For NAPP or NHAP custom enlargement orders only, you can select a corner quadrant (upper right, upper left, lower right, or lower left quadrant) of a scene without ordering a contact print.
2. The contact prints and the custom enlargement template (above) will then be shipped to you.
3. Select one of the above templates that covers your area of interest, cut out or measure the size of the template, and outline the area of photographic interest on the contact print with a marker or tape. The area should be parallel with the sides of the

contact print. Select the enlargement factor for print size and return the annotated print to customer services:

U.S. Geological Survey  
EROS Data Center  
Customer Services  
Sioux Falls, SD 57198

4. When customer services receives your annotated contact prints, your order for custom enlargement products will be placed and your account will be credited for the price of the contact prints (this does not apply to Declassified Intelligence Satellite Photography images). In addition to the price, a setup fee of \$25 per frame will be charged for each custom enlargement.
5. After your enlargements are completed, they will be shipped back to you along with your original contact prints.

6. Priority processing of your custom enlargement order is available at three times the cost of the custom enlargement product and the setup fee. For priority orders only, an adequate map will be accepted.

If you have any questions, please contact customer services:

Telephone: 605-594-6151  
Fax: 605-594-6589
